

THE MARKET CRISIS

1. The Generative Search Shift: B2B buyers no longer browse 10 blue links on Google. They ask **ChatGPT, Perplexity, and Claude** who to buy. If your product is not mapped into machine-readable Knowledge Graphs (JSON-LD), AI search engines hallucinate or recommend your competitor.

2. The Product Truth Gap: Marketing writes aspirational claims on websites, while engineering builds APIs. When claims fail in technical bake-offs, deals are lost and churn spikes.

THE ONTOLEAP SOLUTION

OntoLeap Bridges the Gap: In 60 seconds, OntoLeap crawls your website, extracts your entities, verifies your marketing claims against OpenAPI/code reality, and outputs ready-to-use executive sales battlecards.

Outcome: Guarantees your brand is **cited as #1 in AI search engines** and equips sales reps with **mathematically verified counter-arguments** against competitors.

CORE PLATFORM CAPABILITIES

1. Tri-Ontology Mapper	2. Product Truth Engine	3. AI Citation Authority
Extracts marketing concepts via zero-shot GLiNER NER and connects them to industry schema taxonomies.	Executes automated assertion checks comparing marketing claims directly against real OpenAPI/Swagger specifications.	Scores site-wide citation authority across 4 pillars (25% each): Entity Grounding, Relational Density, Topic Silo Integrity, and Schema Coverage.
Output: Unified Knowledge Graph	Output: Proven vs Disproven Claims	Output: Executive Battlecard PDF
